

Dental Center Pediatrics

Plymouth, MA

Insurance & Financial Agreement

We are pleased that you have dental insurance benefits to help offset the cost of your child's care. Please read the following so we can work together to make the most of those benefits.

We Are a Non-Participating (Out-of-Network) Practice

Our primary goal is to provide exceptional dental care. Dental insurance is a contract between you, your employer, and the insurance company — it has no direct connection to this office. Because we are not contracted with dental insurance companies, any patient can become a patient here regardless of insurance plan.

We encourage you to contact your insurance company directly — by phone or online — to understand your specific benefits. Our staff is happy to assist you in knowing what questions to ask.

Tooth-Colored (Mercury-Free) Restorations

This office does not use mercury-containing (amalgam) restorations. Dental insurance companies often reimburse at a lower percentage for tooth-colored, mercury-free restorations. Despite our best efforts to provide accurate estimates, patients may occasionally owe the difference. This has no bearing on the fees charged by our office — it reflects the coverage negotiated between your employer and your insurance company.

If Insurance Does Not Pay

The extent of insurance coverage varies significantly between plans and companies. If your insurance does not pay as anticipated, the balance remains your responsibility. This office is not responsible for errors in estimates made based on information provided by your insurance company.

Payment Options

We request payment of your estimated patient portion at the time of service. Please speak with any staff member about the payment methods we accept and whether any financing options are available to help your family receive the care your child deserves.

Agreement

I have read, understand, and accept the terms of the above insurance handling and financial policies. I understand that I am personally responsible for all fees incurred as a result of treatment, regardless of insurance coverage.
