

Dental Center Pediatrics

Plymouth, MA

Consent for Electronic & Internet Communications

This consent governs how Dental Center Pediatrics may store, transmit, and communicate your child's patient information electronically, including through secured web-based patient portals and communication systems.

Storage and Access

I grant permission to this practice to upload and store confidential patient information — including demographic, appointment, and clinical information — to secured, password-protected systems used by this practice. I understand that access to these systems requires a user ID and password, and that I am responsible for maintaining the strict confidentiality of any credentials assigned to me.

Security Responsibilities

This practice is not liable for any charges, damages, or losses resulting from my failure to maintain the confidentiality of my credentials, or from my disclosure of those credentials to any third party. I agree to notify this practice immediately of any unauthorized use of my account or any other security concern.

Legal Compliance

This practice warrants that it will, at all times, comply with all applicable federal and state laws governing the gathering, use, transmission, processing, reporting, disclosure, maintenance, and storage of patient information — including HIPAA. The practice will use commercially reasonable efforts to maintain the confidentiality of all patient information uploaded or transmitted on my behalf.

Electronic Communications

I consent to receive appointment reminders, health information, and practice communications via email, SMS text message, and/or secure patient portal message. I understand that standard messaging rates from my carrier may apply to text messages, and that I may opt out of any electronic communication channel at any time by notifying the office.

Limitation of Liability

This practice cannot and does not assume responsibility for my use or misuse of patient information transmitted, monitored, stored, or received through electronic systems. I understand that information disclosed pursuant to this consent could potentially be re-disclosed by a recipient and may not remain protected under federal or state law.
